Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 25-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Kuddes (5,638,410).

As per claim 26, Kuddes discloses a system for distributing a clock signal over an integrated circuit, comprising:

a means for independently generating a plurality of clock signals (clock signal $\phi 1$ and clock signal $\phi 2$) on the integrated circuit...; and

a means (microcontroller 130) for synchronizing phases of the plurality of clock signals to one another based on error signals that are generated based on relative phase different (phase detector 124) between ones of the plurality of clock signals. (See col. 3, lines 21-23, lines 60-63, col. 4, lines 50-67 to col. 5, lines 1-42).

As per claim 25, this method claim is also rejected under the same rationale as set forth in the system claim 26.

3. Claims 1-24 are allowable.

Art Unit: 2138

4. Applicant's arguments with respect to claims 1-26 have been considered but are moot in view of the new ground(s) of rejection.
